# NEW CARD ENHANCED SECURITY

In June 2020, the Department of Revenue implemented a new, more secure driver license and ID card design. Individuals are not required to replace their current driver license or ID card during this time, unless their current credential has reached its expiration or a required change is needed, such as a name or address change. Driver licenses and ID cards with the old design will still be in use alongside the new cards.

Missouri's new card design advances fraud protection measures compared to the old design. The new design includes redundant data, ultraviolet (UV) ink and optically variable features.
